

1000 wh power station factory in Namibia

Overview

Who can develop small power generation facilities in Namibia?

Parties interested in developing small power generation facilities may also look to some of Namibia's Regional Energy Distributors (REDs). Some REDs are looking to develop their own – albeit limited – generation capacity. Partnering with a RED familiar with the ECB's IPP framework might result in faster project implementation.

Does Namibia have a solar power plant?

The government, the ECB, and NamPower have all expressed interest in grid-connected solar and wind renewable solutions, and in May 2015, Namibia inaugurated its first-ever solar power plant – a 4.5 MW plant – which represents one percent of the country's current production of energy.

Who built NamPower power plant?

The plant was built by InnoSun, a French-Namibian company which specializes in renewable energy. It was also the first local IPP with which NamPower signed a power purchasing agreement.

Can NamPower extend the life of the Ruacana Hydro plant?

NamPower commissioned a fourth turbine at the Ruacana hydro plant in 2012 which now generates an extra 90 MW of power. A U.S. Trade and Development Agency (USTDA)-financed study of the Van Eck Power plant provided the Namibian government with several options for extending the life of this plant.
