10MW Mobile Energy Storage Container in Africa

Overview

Does Scatec have a solar-plus-storage site in South Africa?

Scatec's Kenhardt solar-plus-storage site in South Africa (above), which went online at the end of 2023. Image: Scatec. Africa's energy storage market has seen a boom since 2017, having risen from just 31MWh to 1,600MWh in 2024, according to trade body AFSIA Solar's latest report.

What are the most popular solar-plus-storage developments in Africa?

As noted by AFSIA Solar, one of the most notable solar-plus-storage developments in Africa is Norway-based independent power producer (IPP) Scatec's 225MW/1,140MWh Kenhardt project in South Africa. The site started operation in late 2023 (pictured above).

How has energy storage changed in 2022?

This has resulted in an increase in energy storage levels in recent years. In 2022, the continent had around 50MWh of energy storage capacity installed. Since then, energy storage capacity tripled in 2023 and then experienced another 10-fold increase in 2024. Image: AFSIA Solar.

How can energy storage help fill the short-term supply gap?

The report notes this initiative, which is described as a means to fill the short-term supply gap, alleviate the electricity supply constraints, and reduce the extensive utilisation of diesel-based peaking electrical generators. Several initiatives and drivers for energy storage have also been introduced to African countries.

10MW Mobile Energy Storage Container in Africa

Africa's growing energy storage capacity is key to energy self ...

Africa's energy goals are closely tied to advancements in battery storage technology - not only in the generation of electricity but also in its efficient storage and ...
