

24kw inverter

Overview

Can a 24kW solar array be put on an inverter?

A 24kW solar array can be put with an inverter with an AC output of 18.00kW. What you "can" do is not what you "should" do. All inverters have different specs. And based on those specs you might be able to put a LOT more panels on than the rated inverter capacity. That does not mean you should.

What is a 24V inverter?
