

# **3000W high power charging integrated inverter**

## Overview

---

What is a 3000W solar inverter battery charger?

With 3000W rated power, 9000W surge power,  $\approx$ 90% efficiency, dual cooling fans, and LCD monitoring, it's the smart choice for stable, high-demand off-grid or backup systems. LiTime 24V 3000W solar inverter battery charger delivers up to 60A solar charge, 50A AC-DC charge, and 3000W pure sine wave output—all in one unit with 110A max shared current.

What is a litime 24V 3000W inverter charger?

LiTime 24V 3000W inverter charger integrates a solar charge controller (MPPT), a pure sine wave inverter, and a battery charger into one unit. This simplifies wiring, reduces installation space, and enables seamless switching between solar, grid, and battery sources—ideal for backup power systems.

What is the difference between a 2000W and 3000W inverter charger?

The size of an inverter is determined by the maximum and continuous loads it can handle. The 2000W inverter charger can only charge one battery at 170AH, while the 3000W inverter charger can charge up to 2 batteries at 170AH. The battery size will only inform you how long the inverter can draw that load before the battery is drained.

How many batteries can a 3000W inverter charge?

The 3000W inverter charger can charge up to 2 batteries at 170AH, while the 2000W inverter charger can only charge one battery at 170AH.

## 3000W high power charging integrated inverter

---

[Y& H 3000W Solar Hybrid Inverter DC24V to AC230V, Off ...](#)

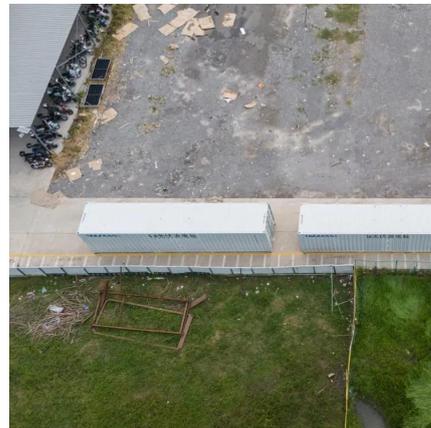

About this item ?Pure sine Wave Inverter?3000W  
Pure sine Wave Inverter 24V DC to AC  
220/230/240V (Single phase/A Hot Leg 230V  
Output, Can't Output 110V AC), built in 80A Mppt  
...
