300wh power station in China in Angola

Overview

How to improve energy supply capacity in Angola?

In order to improve energy supply capacity, the Ministry of Energy and Water of Angola launched a hydropower station restoration and expansion project in 2016. After the expansion, the power generation capacity will increase from 8.8 MW to 34 MW.

Where is the luassim hydropower station repair & expansion project completed?

(Executive editor: Zhu Zeya) The Luassim Hydropower Station repair and expansion project, undertaken by China Gezhouba Group Co., Ltd, a subsidiary of China Energy Engineering Group Co., Ltd, has recently been completed in Angola.

Where is the luassim hydropower station located?

Aerial view of the Luassim Hydropower Station [Photo/sasac.gov.cn] The Luassim Hydropower Station is located on the Luassim River in Lunda Norte in Angola, about three kilometers northeast of the center of Dundo city. The old power station was built in 1953 and put into operation in 1957, with an initial power generation capacity of 8.8 MW.

Why is the Lunda Norte hydropower station important?

As an important part of the power supply system in Lunda Norte, Angola, the hydropower station can effectively alleviate the electricity demands of several towns in Lunda Norte, and provide power energy for nearly 200,000 local residents and more than 30 industrial enterprises.
