

IMK CONTAINERS

# 40-foot solar container for agricultural irrigation in Berlin

## Overview

---

What is a container farm called The Greenery?

The Greenery is a next generation container farm enabling local, hydroponic food production anywhere in the world. Developed by Freight Farms—the company that created the world's first container farm—The Greenery packages the most advanced indoor growing technology into a modular 40-foot shipping container.

Which irrigation project is a candidate for solar?

With our solar pump systems you can consider any irrigation project a candidate for solar.

How does the greenery irrigation system work?

The Greenery™ Container Farm's cultivation area uses gravity to make an automated drip irrigation system possible. The irrigation system is maintained by Farmhand®, which senses and ensures nutrient levels and delivers water to the plants on a regular schedule. Airflow is also controlled to optimize plant growth.

Which solar pumping systems work with my irrigation system?

If you already have an irrigation system in place, then the LORENTZ range of solar pumping systems can work with what you have. Drip, sprinkler, pivot or flood irrigation methods can be supported and integrate well to LORENTZ pumps. Our pumps can produce very high flows and high pressures, even offering features such as constant pressure and flow.
