

# **500MW Energy Storage Project Return on Investment**

## Overview

---

When will a 500mw/1000mwh shared energy storage project start?

On April 29, 2025, the first phase of the 500MW/1000MWh shared energy storage project in Luliang County, Qujing City was successfully grid-connected and operational.

Do investors underestimate the value of energy storage?

While energy storage is already being deployed to support grids across major power markets, new McKinsey analysis suggests investors often underestimate the value of energy storage in their business cases.

How many mw/400mwh energy storage units did Eve energy supply?

The completed first phase delivers 200MW/400MWh capacity with a 20-year design lifespan. EVE Energy supplied 40 sets of 5MW/10MWh energy storage units, achieving full installation and commissioning within one week of equipment arrival – showcasing exceptional delivery efficiency.

Should energy storage be undervalued?

The revenue potential of energy storage is often undervalued. Investors could adjust their evaluation approach to get a true estimate—improving profitability and supporting sustainability goals.

## 500MW Energy Storage Project Return on Investment
