# 500w household solar light

Overview

What is a 500-watt solar system?

A 500-watt solar system can be used in cities where electricity is available but power cuts are frequent. It is designed to provide power for 4-5 hours to 2-3 BHK homes in India having an unreliable electricity supply, with a peak load of up to 650 Watts.

How much power does a 500W solar panel consume?

If your 500W solar panel produces 3kw in 6 hours, calculate how much power you consume for the rest of the day. From 10:00 AM until 4:00 PM, you consume 3kw of power.

What is a 500W solar panel kit?

A 500w solar panel kit delivers reliable energy for smaller buildings. Each DIY solar panel kit, including the 500W kit, comes complete with panels, batteries, inverter, and the accessories needed to create a self-sufficient off-grid energy solution.

What other appliances can run on a 500W solar panel?

In addition to a 12V mini-fridge, ceiling fans, printers, modems, and other electronic devices will also function properly when powered by a 500W solar panel during sufficient sunlight.
