

550w maximum power of solar panel

Overview

What is a 550W solar panel?

JA Solar's 550W panels achieve impressive efficiency ratings of 21.2-21.3%, placing them among the top performers in the residential and commercial solar market. This high efficiency translates to more power generation per square foot, making them ideal for space-constrained installations.

What is the maximum power output of a solar panel?

With a maximum power output of 550W and a cell efficiency of 21.3%, it is ideal for those looking to maximize energy production on limited space. The panel utilizes half-cell technology, which reduces power loss and boosts overall system efficiency, especially in shaded conditions.

How much power does a solar panel have?

Sun Gold Power Inc Solar Panel Series Mono Power: 550W. Detailed profile including pictures, certification details and manufacturer PDF.

Does JA Solar 550W work well in high-temperature environments?

Independent testing shows JA Solar 550W panels perform well in high-temperature environments. At 25°C above standard test conditions (45°C cell temperature), power output typically decreases by approximately 8.75%, which is competitive with other premium panels.
