8mm anti-slip solar glass

Overview

What is a solar cell cover glass?

Our Solar Cell Cover Glasses offer a range of technical advantages when used for space or terrestrial applications such as photovoltaic systems and optical solar reflectors. Transmittance across the spectrum from UV-A to near-infrared is excellent, while low-wavelength UV radiation is effectively blocked.

What is solar glass 0787?

Consistently stable transmission from UV-A into NIR range. Absorbs the majority of harmful UV-B and UV-C radiation. Solar Glass 0787 acts as a barrier layer, preventing damage from several types of high-energy particle radiation. High transmittance in VIS and NIR ranges, even after long exposure to different types of radiation.

What is BIPV glass?

BIPV Glass is building-integrated photovoltaics glass, which is also called solar powered glass. The glass has VDE, UKCA, CE and ROHS certification. And it can generate electricity and is also part of the building exterior glass. It replaces traditional glass in areas such as facades, roofs, skylights and other structures.

How is solar cell cover glass made?

SCHOTT's decades of experience and expertise in glass manufacturing allows Solar Cell Cover Glass to be produced in different thicknesses directly drawn from the melting tank. This includes ultra-thin and flexible glass available down to UTG thicknesses below 70 µm as cut-to-size substrates.

8mm anti-slip solar glass

[China Solar Glass Supplier](#)

First Glass Co., Ltd., a leading China solar glass supplier, provides certified (CE, ROHS, VDE) high-quality solar and photovoltaic ...
