# A factory that makes energy storage batteries in Bergen Norway

## Overview

---

Why is Norway a leader in battery manufacturing?

As a pioneer in the clean energy sector, Norway has also shown strength in battery manufacturing. As the global demand for sustainable energy solutions grows, Norwegian battery manufacturers are at the forefront of this change.

Does Norway have a battery market?

Today Norway has not one, but two huge battery markets. “There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It’s the key to turning intermittent wind and solar into a stable energy source,” explains Pål Runde, Head of Battery Norway.

What is battery Norway?

Battery Norway (Norwegian Battery Platform) is a national industrial collaboration platform focused on innovation and sustainable value creation opportunities, encompassing the entire battery supply chain. It will closely follow the EU’s battery strategy and act as an advisor to the authorities. Battery Norway aims to help to:

Are Norwegian battery manufacturers leading the Green Revolution?

In summary, Norwegian battery manufacturers are leading the green revolution in the global battery industry, and through technological innovation and sustainable production strategies, these companies are not only achieving significant success within Norway, but are also gaining a strong foothold in the international market.
