

# Adjust the brightness of home solar lights

## Overview

---

How to make a solar panel brighter?

The efficiency of charging and therefore extended brightness is enhanced with the best direction of light into the panel. A reflector can be created from aluminum foil or even anything painted white paint. The bigger the surface area of reflector, the better as long as it points the light into the panel.

How do I adjust the brightness of my LED lights?

9.0 LED BRIGHTNESS ADJUST Allows LED brightness to be set to personal preference in both Day/Night modes. First select the Day/Night mode to be adjusted. Press and hold PB2 to cycle through the 8 brightness levels from 1 – 8 (min – max). Release PB2 at required brightness.

How can I increase the brightness of my car's charging panel?

Think about channeling light into the panel as if it is like adding fuel to a car. Spraying gas all over the car will see very little go into the tank, so it is with light too. The efficiency of charging and therefore extended brightness is enhanced with the best direction of light into the panel.

How to adjust the backlight brightness?

To adjust the backlight brightness, select one of the three levels: high, middle, or low. After setting, press the Write Button to save the setting. The default is high for 3-level adjustment.
