

IMK CONTAINERS

After-sales service for 25kW folding container cement plant applications

Overview

What is shutdown maintenance in cement plant?

Every cement plant is stopped to perform important major maintenance activities, repairs and replacement jobs which are not possible during usual operation. The shutdown maintenance requires effective planning and teamwork among all stakeholders, vendors and service providers to complete maintenance activities within specified period.

Do you provide after-sales services after a project is completed?

Even after a project is complete, We provide a variety of after-sales services to ensure trouble-free, safe and efficient operation of the plant facilities and transportation systems we deliver.

What auxiliary equipment is used in a cement plant?

Cement grinding mill: our cement mill is widely applied to dry or wet cement grinding units, it can be used as a raw material mill, and also applies to cement grinding plants. Auxiliary equipment: there are many auxiliary cement equipment items in the cement plant, they play their own roles in every section.

Why do cement plant operators need spare parts?

Cement plant operators need to maintain critical spare parts to ensure smooth operation of plant. We help customers in development of inventory, managing all consumables including spare parts and tools. We are one of the prominent suppliers of a wide range of Plant machinery equipment and spare parts for cement plants.
