

Albania field solar solar container power supply system

Overview

Will Albania have a solar power project?

The Ministry of Infrastructure and Energy of Albania received four applications for solar power projects with a combined capacity of 235 MW. A proposed unit in Fier, the country's photovoltaics hub, would be the second-biggest in the country. Solar power accounts for 6% of electricity production in Albania.

Where is Albania's second largest photovoltaic plant?

The company laid the cornerstone late last year for the 100 MW solar power system in the west of Albania. The site is near the port city of Durrës. One other PV plant is planned for expansion to 100 MW. Now another project of the same size is racing for the position of the country's second-largest photovoltaic facility.

Could a photovoltaic unit be the second-biggest in Albania?

A proposed unit in Fier, the country's photovoltaics hub, would be the second-biggest in the country. Solar power accounts for 6% of electricity production in Albania. More than half of the photovoltaic output is from the Karavasta facility, the biggest of its kind in the Western Balkans. It has 140 MW in peak capacity.

What's new in Albania's 'Sunny Side energy' plan?

The positive decision for the two schemes was announced by the Council of Ministers on Thursday. The larger plan calls for the installation of a 100-MW solar farm in the Fier region of southwestern Albania by renewable energy producer Sunny Side Energy, which was set up in 2023 by Albania-based construction-to-oil conglomerate Kastrati Group.
