

Algeria LNG power station generator

Overview

How many MW does Algeria's new power plant generate?

Both plants, being developed by Algeria's state-owned Sonelgaz, will each generate 1,340 MW. Both projects are expected to start operations in 2025 and are expected to enhance Algeria's power generation infrastructure while supporting energy security and fuelling the country's economic growth.

How will natural gas boost Algeria's energy exports to Europe?

These developments – spanning natural gas, electricity and renewable energy – will enhance Algeria's energy exports to Europe and expand its domestic capacity. Hassi R'Mel Gas Boosting Project The Hassi R'Mel gas field, one of the largest in the world, is central to a \$2.3 billion project designed to optimize gas flow efficiency to Europe.

Will GE vernova install high-capacity gas turbines in Algeria?

To help address the issue, Algerian officials called on GE Vernova to install dozens of high-capacity gas turbines in northern Algeria and truck-mounted TM2500s in the rest of the country. Each TM2500 can deliver up to 36 megawatts (MW) of power and can operate efficiently at partial load.

How much natural gas did Algeria export in 2023?

According to the Energy Institute's 2024 Statistical Review of World Energy, Algeria exported about 1.9 Tcf of natural gas in 2023, most of which went to Europe. About 672 Bcf of natural gas was exported as LNG, and the remaining 1.2 Tcf was shipped via pipeline (Figure 13).²¹
