

All types of solar panels

Overview

What are the different types of solar panels?

Discover the six main types of solar panel, including thin-film, perovskite, and the best type for your home: monocrystalline. What kind of home do you live in?

When you're considering whether to get solar panels, it's a good idea to look into all the different types, to ensure you choose the best system for your home.

What type of solar panel do I Need?

The type of solar panel you need depends on the type of system you want to install. For a traditional rooftop solar panel system, you'll usually want monocrystalline panels due to their high efficiency. If you have a big roof with a lot of space, you might choose polycrystalline panels to save money upfront.

How many cells are in a solar panel?

A typical solar panel contains 60, 72, or 90 individual solar cells. There are 4 major types of solar panels available on the market today: monocrystalline, polycrystalline, PERC, and thin-film panels. Also known as single-crystal panels, these are made from a single pure silicon crystal that is cut into several wafers.

What are the different types of solar panels for UK homes?

The most common types of solar panels for UK homes are monocrystalline and polycrystalline, both made from silicon.
