

# Are Berlin's 5G base stations shared by telecom operators

## Overview

---

Does Germany have a 5G network?

The Bundesnetzagentur has updated its mobile network coverage map for Germany. Rollout of the high-performance 5G networks by mobile operators is making progress. 5G coverage by at least one network operator has increased in recent months to around 79% of the area of the country (as at October 2022).

Which German telecom companies are launching 5G services?

Another German telecom company that has launched 5G services in the country is Vodafone. They turned on their first 25 base stations on July 16, 2019, added Berlin a month later, and currently cover 10 million people with the new network. Customers can use 5G with a compatible phone.

Which telco is deploying 5G?

The most active telco in terms of 5G deployments was Deutsche Telekom, which expects to end 2019 with a total of 450 5G base stations across the country, according to recent press reports. By the end of 2020, the number of 5G sites is expected to climb to nearly 1,500.

What percentage of the country has 5G coverage?

5G coverage by at least one network operator has increased in recent months to around 79% of the area of the country (as at October 2022). When the first data were collected in October 2021, coverage was at around 53%. Current data show that the 5G coverage achieved by individual mobile operators ranges from about 37% to 55% of the country.
