Are energy storage projects balanced now

Overview

What is the monthly energy storage project analysis?

Since June 2025, the monthly energy storage project analysis has been divided into two sections: “Grid&Source-Side Market” and “User-Side Market”. This issue focuses on interpreting the grid&source-side market in October. 1. Dec.4-5 | 2025 China Energy Storage CEO Summit | Xiamen, Fujian Register Now to attend.

What drives energy storage project development?

Globally, energy storage project development is increasingly driven by the utility-scale segment, with mandates and targeted auctions driving gigawatt-hour projects in markets like China, Saudi Arabia, South Africa, Australia and Chile.

Will energy storage growth continue through 2025?

With developers continuing to add new capacity, including 9.2 GW of new lithium-ion battery storage capacity in 2024 through November 2024 and comparable levels of growth expected through the fourth quarter of 2024, energy storage investments and M&A activity are expected to continue this trajectory through 2025.

What is the future of energy storage in China?

In China, generation-side and grid-side energy storage dominate, making up 97% of newly deployed energy storage capacity in 2023. 2023 was a breakthrough year for industrial and commercial energy storage in China. Projections show significant growth for the future.

Are energy storage projects balanced now

[CHINA'S ACCELERATING GROWTH IN NEW TYPE ...](#)

In terms of storage types, the dominant advantage of lithium-ion batteries continues to expand, accounting for 97.4% of the new type storage installation. Other types, such as air ...
