

# **BESS Telecom Energy Storage Power Station Bidding Information**

## Overview

---

How much reactive power does Bess supply?

BESS can supply nearly 10 MVAR of reactive power by consuming a small amount of energy. Fig. 11 plots the SOC of BESS#7 in different case studies. In most periods during the next day, due to the highest price uncertainty and the owner's risk aversion policy, case study 1 has the highest SOC.

Is NTPC preparing a bid for a Bess project?

Its renewable energy arm, NTPC REL, recently called bids for a 2,500 MW/10,000 MWh BESS project at thermal power stations. Additionally, earlier, NTPC had also issued a tender to develop and test a pilot BESS to replace diesel generators at the Dadri Thermal Plant.

How much power does Bess sell?

It is displayed in Fig. 14, at  $t = 4$ , BESS#15 sells 90 % of active power in the DAM and 10 % in the RTM; at  $t = 14$ , it sells 48 % of active power in the DAM and 52 % in the RTM, and at  $t = 22$ , it sells 62 % of active power in the DAM and 38 % in the RTM.

What is a battery energy storage power station (Bess)?

In recent years, battery energy storages stations (BESSs) account for the largest proportion in large-scale energy storage power station projects due to its advantages such as rapid response, high integrated power, decreasing cost year by year and short construction cycle.

## BESS Telecom Energy Storage Power Station Bidding Information
