

Bahamas solar energy storage subsidies

Overview

Who supports solar power in the Bahamas?

This goal is supported by the Inter-American Development Bank (IDB) and the Bahamas Development Bank (BDB). Currently, solar power makes up less than 1% of all energy generated in The Bahamas. Oil is responsible for nearly all power generation with a 99% share of electricity production.

Is solar a good option in the Bahamas?

On a kilowatt-hour (kWh) by kilowatt-hour basis, solar's your best, but you need to add battery energy storage capacity in order to reach higher levels of penetration," he noted. "Nassau's [the Bahamas' largest city] is a pretty big grid, and it can take a fair bit of solar without storage," Burgess continued.

Does Bahama have a solar power project?

The Bahamian government owns and manages property rooftops, parking lots and green spaces, on which solar power projects could be developed. Several projects that capitalize on that solar power potential are underway, Jones Bahamas points out.

Is the Bahamas a difficult place to generate electricity?

BPL Chairman Donovan Moxey was quoted in a Tribune Business news report. The Bahamas is a very difficult place to generate electricity, distribute it and sell it, even as compared to other Caribbean islands, Chris Burgess, Islands Energy Program projects director, told Solar Magazine.
