Bahrain emergency energy storage power supply price

Overview

Where does Bahrain's energy supply come from?

Bahrain's energy supply comes largely from the exploitation of its domestic fossil fuels resources. The country is also a major producer and exporter of oil, petroleum products and natural gas. Bahrain's energy supply comes largely from the exploitation of its domestic fossil fuels resources.

Where does Bahrain's oil come from?

View the detailed fundamentals of the market at country level (graphs, tables, analysis) in the Bahrain energy report Oil production has remained stable since 2013, with 10 Mt in 2019; around 75% of the production comes from the Abu Safah field.

Where is Bahrain located?

Bahrain is an island nation in the Persian Gulf, located between the Qatar peninsula and the north-eastern coast of Saudi Arabia. Bahrain is part of the Gulf Cooperation Council (GCC): the regional political and economic union comprising six countries of the region (Bahrain, Kuwait, Oman, Qatar, Saudi Arabia, and the United Arab Emirates).

Why has Bahrain resorted to austerity?

The fall in oil prices since 2014 (and absence of buffers despite the 2016-2018 recovery) has caused a significant deterioration in Bahrain's public finances. Consequently, the government resorted to austerity measures, with several increases in fuel prices over the last 6 years.
