Why is battery storage important in Thailand?

Thailand is positioning battery storage as a tool for both industrial competitiveness and renewable integration. The Alternative Energy Development Plan (AEDP) targets 30% renewables by 2037 and includes storage as a core enabler. Rising industrial tariffs are pushing factories and industrial parks toward solar plus storage systems.

Which country has the most policy driven battery storage market in Southeast Asia?

The Philippines has become the most policy driven battery storage market in Southeast Asia. Through Green Energy Auction Program (GEA) 4, the Department of Energy has integrated storage as a mandatory element of large-scale renewable tenders. This decision has created a multi gigawatt pipeline of projects that have a clear commercial path.

Will battery energy storage reshape Asia?

Southeast Asia is shifting from the sidelines of battery storage to the centre of a global energy transition. It is on the brink of a battery energy storage (BESS) leap that could reshape its energy systems. The region's market is valued at around USD 3.5 billion in 2024 and is projected to approach USD 5 billion by 2030, expanding at 6 % CAGR.
