

# **Bangladesh solar container outdoor power BESS**

## Overview

---

How much energy storage does Bangla-Desh need?

120GW of RE generation. If a similar ra-tio were to be considered for Bangla-desh's short-term RE aspirations (~1GW in the next three years), the re-sulting energy storage requirements would amount to 250MW/ 500MWh of energy storage.

Is energy storage regulated in Bangladesh?

For example, the Bangladesh Energy Regulatory Commis-sion (BERC) Licensing Regu-lations 2006 do not include rules for licensing of energy storage technologies (except for pumped storage). The institutional framework for the procurement and deploy-ment of such projects is well established in the country.

What can be done about grid connected energy storage in Bangla-Desh?

Limited experience and knowledge of grid connected energy storage in Bangla-desh. Early-stage pilot programmes such as the planned 2MW grid connected BESS funded by the Asian Development Bank (ADB) would further support capacity building and knowledge transfer. 3.3.

Will European Union fund energy storage in Bangladesh?

Bangladesh government and potential investors into energy storage were handed European Union-funded roadmap for the technology's development.
