Source: Photo by Chad Russell via Pexels Tesla (NASDAQ: TSLA) has officially started production at its Shanghai battery megafactory, dedicated to manufacturing its high-capacity Megapack energy storage systems, according to China's state news agency, Xinhua.

Will tesla open a Megapack battery plant in Shanghai?

Tesla's plan to open a Megapack battery plant in Shanghai was announced In April 2023, cementing another foothold for the company in China. The land acquisition deal for the project was signed in December of the same year, and it received a construction permit earlier this month.

How much energy does a Megapack store?

The U.S. company already has a factory for its Megapacks in California, which has an annual capacity of 10,000 units. Each Megapack unit can store over 3.9 megawatt-hours of energy, sufficient to power approximately 3,600 households for one hour.
