

# Battery energy storage project details

## Overview

---

What is a battery energy storage system (BESS) project?

A Battery Energy Storage System (BESS) project is an energy storage technology that uses rechargeable batteries to store electrical energy from various sources and release it when needed, functioning like a large-scale rechargeable battery that stabilizes the grid and enables renewable energy integration. Which is the largest BESS project in India?

.

What is the battery energy storage roadmap?

This Battery Energy Storage Roadmap revises the gaps to reflect evolving technological, regulatory, market, and societal considerations that introduce new or expanded challenges that must be addressed to accelerate deployment of safe, reliable, affordable, and clean energy storage to meet capacity targets by 2030.

Where is totalenergies launching a battery storage project?

In Belgium, TotalEnergies has launched its largest battery storage project in Europe (75 MWh) at the Antwerp platform, and another project is also underway at the Feluy depot (75 MWh). In Germany, TotalEnergies acquired KYON, a company specializing in the development of battery storage projects in that country, in 2024.

Which is the largest battery storage project in India?

The 495 MWh co-located solar-BESS project at Lakhisarai, Bihar by L&T is currently India's largest battery storage project awarded by a state utility, featuring 116 MWac solar with 241 MWh BESS and 4-hour storage duration. How much land is required for BESS?

## Battery energy storage project details
