

Battery storage prices in Italy

Overview

Which countries have the most battery storage installations in Europe?

Germany, the U.K., and Italy emerged as the leading markets for battery storage installations in Europe during 2023. According to TrendForce statistics, Germany, the U.K., and Italy added capacities of 6.1GWh, 4.0GWh, and 3.9GWh, respectively, to their energy storage infrastructure.

Does Italy have a strong appetite for battery storage?

Image: TERNA via Twitter. The success of an auction for fast reserve grid services held by Italy's transmission system operator (TSO) indicates a strong appetite for battery storage, but market rules and regulations need some revision to capture that opportunity.

How much will Italy's energy storage program cost in 2023?

In December 2023, the EU greenlit Italy's energy storage program, earmarking a hefty investment of €17.7 billion. This initiative is anticipated to facilitate the construction of over 9GW/71GWh of energy storage systems (ESS).

What is Italy's energy storage structure?

Italy's energy storage structure is also dominated by residential storage, which accounts for more than 80% of new installations. In December 2023, the EU greenlit Italy's energy storage program, earmarking a hefty investment of €17.7 billion.
