

Botswana LiFePO₄ Cylindrical EK Battery

Overview

What are the different types of LiFePO₄ battery cells?

Kinstar offers two types of LiFePO₄ (LFP) battery cells - cylindrical and prismatic. Both provide reliable and sustained power for high power applications. Standard cylindrical cell models such as 18650, 26650, 32650, 38120. Prismatic cells are similar to Li-Polymer cells, they can be developed to various flexible sizes.

Is LiFePO₄ a good battery?

So the cost of the lifepo₄ pack is relatively low, and the yield of lithium batteries is higher than that of prismatic lithium batteries and soft pack lithium batteries, with better consistency and safety. Generally packaged in steel shells, lifepo₄ cylindrical cells are safer but heavier, resulting in lower specific energy levels.

What are LiFePO₄ cylindrical cells?

The lifepo₄ cylindrical cells are the first mature and industrialized lithium battery products. After more than 20 years of development, the production process of lifepo₄ cylindrical cells is now mature, with high production efficiency and relatively low cost.

What are lithium iron phosphate (LiFePO₄) batteries?

Lithium iron phosphate (LiFePO₄) batteries are known for their high safety, long cycle life, and excellent thermal stability. They come in three main cell types: cylindrical, prismatic, and pouch. Each of these types has distinct characteristics that make them suitable for various applications.

Botswana LiFePO4 Cylindrical EK Battery
