# Brussels New Energy Storage Enterprise

## Overview

---

Where is Europe's largest battery energy storage system located?

Brussels Morning Newspaper » Economy » ENGIE launches Europe's largest battery energy storage system in Belgium Brussels (Brussels Morning) – ENGIE is constructing a massive Battery Energy Storage System (BESS) in Vilvoorde, Belgium, with 200 MW capacity and 800 MWh storage, aiming to support 96,000 households with renewable energy solutions.

What is the energy storage project in Belgium?

The main energy storage project in Belgium is the construction and operation of an offshore “energy atoll” (essentially a manmade offshore pumped-storage facility), for which the Electricity Act has been modified in 2014 (see below), in order to support offshore wind-generated electricity production.

How much battery storage does Belgium have?

Belgium's battery storage buildout remains modest relative to peer nations. As of 2023, the country had under 200 MWh of operational large-scale battery capacity, compared to over 2 GWh in the UK and more than 1 GWh in Germany.

Is ENGIE generating a Bess project in Belgium?

ENGIE is also generating two other BESS projects in Belgium which already have credentials in place, a 100-MW/400-MWh scheme in Kallo and an 80-MW/320-MWh battery in Drogenbos. The firm targets 10 GW of battery capability globally by 2030. At the end of 2023, it contained 1.3 GW of battery capacity in function and 3.6 GW secured under development.
