

Cambodia 5g base station installation company

Overview

Will 5G be available in Cambodia?

KINGTEL has a master plan to build 3,000 base stations of 5G in Cambodia over 2 to 3 years including the first phase of 5G SA core network, transmission network and related technical equipment. It is expected that 5G SA network will be commercially available and accessible for more than 90% of Cambodian population by the end of 2020.

Why is Cambodia integrating 5G into the telecommunications sector?

This move is part of the country's broader strategy to enhance digital government, businesses, and citizen engagement. The Ministry of Posts and Telecommunications (MPTC) is working on integrating 5G into Cambodia's telecommunications sector, focusing on expanding bandwidth and network coverage to meet the growing demand for high-speed internet.

Is 5G a long-term solution for Cambodia's digital future?

Additionally, long-term initiatives, such as undersea internet connections, are already in the works. At a recent conference summarizing Cambodia's digital progress from 2020 to 2024, Cheang Sopheak, the director-general of MPTC's Directorate General of Radio Frequency Spectrum Management, discussed the transformative potential of 5G.

How will 5G impact Cambodia's digital transformation in 2025?

In 2025, Prime Minister Hun Manet emphasized the importance of 5G in supporting digital government, digital citizenship, and digital businesses, highlighting its role in driving Cambodia's digital transformation. The introduction of 5G technology in Cambodia promises numerous benefits across various sectors:
