

Cambodia has built an energy storage power station

Overview

Will Cambodia achieve 70% renewables by 2030?

Cambodia is targeting 70% renewables by 2030. Image: Huawei Digital Power. Huawei Digital Power has successfully commissioned what it claims is Cambodia's first grid-forming battery energy storage system (BESS) certified by TÜV SÜD.

How does Cambodia supply electricity?

60) supply electricity to local licensees in surrounding areas. In addition, Cambodia imports power at 22 kV from the Lao PDR, Thailand, and Viet Nam to supply areas along the border and extends medium-voltage supply to other licensees through three separate medium-voltage distribution systems.

Is Cambodia's first grid-forming Bess certified by TÜV SÜD?

Huawei Digital Power has successfully commissioned what it claims is Cambodia's first grid-forming BESS certified by TÜV SÜD.

Does Cambodia have a decarbonisation strategy?

Indeed, Cambodia received a 49% tariff on products, the highest of all countries in the region. Despite this, the country is continuing to press on with its decarbonisation journey and attracting international manufacturers to invest in its transition while also catering for the global market.
