Cambodia multifunctional energy storage power supply price

Overview

What is the primary energy supply in Cambodia?

1. 5. The total primary energy supply in Cambodia was about 4.8 million tons of oil equivalent in 2015.8 Fuel wood and other biomass accounted for an estimated 44.4% of the total, oil and petroleum products for 38.5%, coal for 10.7%, hydropower for 3.6%, and electricity imports for 2.8%.

What is Cambodia's New Power Development Plan?

In its new Power Development Plan, Cambodia plans to invest US\$1.8bn to improve its electricity transmission network. Following the Government's decision to stop building new coal plants, a new 900 MW gas plant is expected. The Ministry of Mines and Energy (MME) is in charge of the energy policy through the General Department of Energy (GDE).

Why is electricity so expensive in Cambodia?

Electricity prices in Cambodia are among the most expensive in the region due to a shortage of integrated high-voltage transmission systems and the high cost of imported diesel fuel. Power in provincial cities is more expensive and less reliable than the supply in Phnom Penh.

What is Cambodia's power development master plan 2022-2040?

In its Power Development Master Plan (PDP) 2022-2040, Cambodia announced that there would no more investment of coal power plants after 2024, and renewable energy (domestic and imported) would play a significant role towards Cambodia's transition to clean energy.
