# Cameroon wind and solar energy storage power station

## Overview

---

Does Scatec have a solar power plant in Cameroon?

10 June 2024, Cameroon/Norway: Release by Scatec has entered into two new lease agreements with the national electricity company ENEO in Cameroon, expanding its existing solar and battery storage power plants in the country to 64.4 MW of solar and 38.2 MWh of batteries.

Does Cameroon need a wind power plant?

Numerous studies have previously been conducted to support the growth of Cameroon's various renewable energy sources. Although a 42 MW wind power plant project is being prepared for the West region of Cameroon, wind energy is the one that interests us because it has not yet been utilized in the nation .

How much energy will release supply in Cameroon?

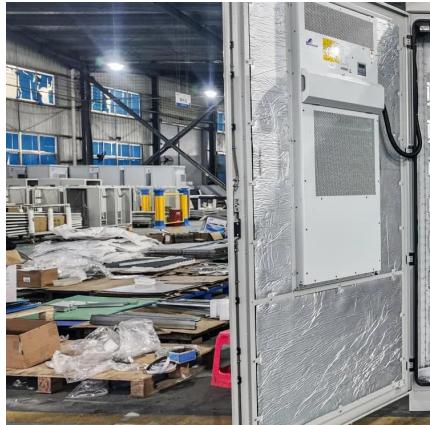

When the extensions of the projects are completed, Release's projects in totality will supply energy to about 200,000 households in Cameroon, according to ENEO estimates, generating an annual production of about 141.5 GWh of electricity.

Does Cameroon have a wind energy sector?

The wind energy sector is not well-known, and the country has no previous experience in wind power generation (Kidmo et al., 2021). Although access to power in Cameroon has steadily improved from 29% in 1991 to 62.66% in 2018 (WorldBank, 2021), there is still a big rural-urban divide.
