

Canada solar and Energy Storage

Overview

What is Canada's energy storage capacity?

Canada's energy storage capacity grew 192% in the past 5 years (2019-2024). Canada's total wind, solar and storage installed capacity is now more than 24 GW, including over 18 GW of wind, more than 4 GW of utility-scale solar, 1+ GW on-site solar, and 330 MW energy storage. Canada now has 341 wind energy projects producing power across the country.

What is Canada's solar energy capacity?

Canada's total wind, solar and storage installed capacity is now more than 24 GW, including over 18 GW of wind, more than 4 GW of utility-scale solar, 1+ GW on-site solar, and 330 MW of energy storage. Canada's solar energy capacity (utility-scale and onsite) grew 92% in the past 5 years (2019-2024).

Who is energy storage Canada?

Energy Storage Canada is the only national voice for energy storage in Canada today. We focus exclusively on energy storage and speak for the entire industry because we represent the full value chain range of energy storage opportunities in our own markets and internationally.

How much solar energy will Canada have in the next 5 years?

Solar energy capacity increased by 92% in that 5 year period. Canada is estimated to install at least 10 GW of new wind, solar, and storage capacity by 2030.
