

# Canberra solar container system

## Overview

---

Does Canberra have solar?

Canberra is home to an increasing number of solar systems, with thousands of households utilising the sun to power their homes and reduce their energy bills. But when it comes to installing solar in Canberra, what should you be aware of, and what's available to you?

Find out more about solar power in Canberra with this Canstar Blue guide.

How much does solar cost in Canberra?

4kW systems or larger will generally cost over \$4,200. Canberra is home to an increasing number of solar systems, with thousands of households utilising the sun to power their homes and reduce their energy bills. But when it comes to installing solar in Canberra, what should you be aware of, and what's available to you?

Does solar energy storage make economic sense in Canberra?

Whether or not solar energy storage makes economic sense for your home in Canberra depends first and foremost on whether or not you already have a solar system, and if you do whether or not you have access to a Territory-supported solar feed-in tariff.

Can I install a solar system in Canberra without council permission?

Households can typically install a solar system up to the size of 10kW in Canberra without council permission. Once you have received council permission, you'll then need to apply for a new connection with Evoenergy - ACT's electricity distributor - to connect to the grid.
