# Cebu Philippines AC coupled energy storage inverter

## Overview

---

What is a hybrid energy storage system in Central Visayas?

Considered one of the first large-scale energy storage systems in Central Visayas, the hybrid BESS will provide ancillary services by storing surplus electricity and releasing it to the grid when needed to help stabilize power supply.

What is energy storage inverter?

Energy storage inverter can integrate renewable energy sources by transferring energy to periods of high demand, or provide grid services such as frequency control or rotating backup. Energy storage inverters can also be used in the form of thermal and cooling energy or as a synthetic fuel, for example for transport.

How ACEN is revolutionizing energy solutions in the Philippines?

ACEN is revolutionizing energy solutions in the Philippines with cutting-edge battery storage projects. These initiatives are tailored to enhance grid reliability, allowing for smoother integration of renewable sources and providing critical backup during peak demands.

Why is ACEN redefining energy transition in the Philippines?

Each project is a step forward in our mission to deliver efficient and sustainable energy solutions across the region. ACEN is redefining energy transition in the Philippines through the strategic implementation of advanced energy storage systems co-located in some of its renewable energy projects.
