

Central Africa Solar Tiles

Overview

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

How do solar tiles work?

Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof. Photovoltaic cells in solar tiles turn sunlight into direct current (DC) energy.

What is a Solar Tiled Roof?

A Solar Tiled Roof is a system that combines solar and roofing functionality into a perfect energy production system without compromising the visual appearance of your home. The building-integrated modules for tiled roofs interlock with nearly all concrete and clay tiles, leaving your home as beautiful as it ever was. Solar Tiled Roof is for homeowners looking to harness solar energy in an aesthetically pleasing way.

What is a Marley solar tile system?

The Marley Solar Tile system consists of a series of PV roof tiles that are integrated into the roof line. Whenever sunlight reaches the cells, it results in an electrical current suitable for powering your home. As a bonus, you can also feed excess energy back into the grid and earn money.
