

Chilean Energy Storage Company

Overview

Why is Chile pursuing energy storage in Antofagasta?

Chilean president Gabriel Boric (centre) at the inauguration of an energy storage plant in the northern region of Antofagasta in April 2024. Chile has strong conditions for wind and solar energy, and is pursuing storage to help overcome intermittent supply (Image: Ximena Navarro / Dirección de Prensa, Presidencia de la República de Chile).

Where are Chile's battery energy storage facilities located?

Chile's first battery energy storage projects were commissioned in 2009, and all but two of its 16 administrative regions have facilities in operation, under construction or in the planning stage. The greatest installed capacity is found in the northern regions of Antofagasta and Tarapacá, the country's solar powerhouses.

How can technology help develop solar and storage projects in Chile?

Several technological innovation can help develop solar and storage projects in Chile. This includes AI, smart grids, and energy storage innovations. Chile generates over 60% of its electricity from renewable sources, with the Atacama Desert hosting some of the world's most powerful solar farms.

Will Zelestra develop solar and storage projects in Chile?

Zelestra will develop a 220 MWp of solar Photovoltaic and 1 GWh of energy storage capacity in Chile. Solar and storage projects are crucial in Chile's decarbonization goals for enhanced security, grid stability, and efficient distribution. Several technological innovation can help develop solar and storage projects in Chile.

Chilean Energy Storage Company

[Chile moves on storage to 'decarbonize the night'](#)

Chile has emerged as a world leader in hybrid systems and standalone energy storage since implementing its Renewable Energy Storage and Electromobility Act in 2022. ...
