

Chilean High-Efficiency Procurement of Photovoltaic Containers

Overview

Does Chile have a Bess & solar PV project?

Chile has seen a surge in co-located BESS and solar PV projects, either operational or in construction, as the country faces an increase in curtailment and transmission issues. Chilean solar PV and wind saw nearly 6TWh of capacity curtailed in 2024, according to trade body the Chilean renewable energy and energy storage association (ACERA).

When will large-scale energy storage projects go online in Chile?

The Chilean authorities plan to hold the first procurement exercise for large-scale storage projects in 2024, with the first systems expected to go online in 2026. The president of Chile, Gabriel Boric, has said that the government is now preparing a bill to establish a tender mechanism for large-scale energy storage facilities.

Is Chile preparing a tender mechanism for large-scale energy storage facilities?

The president of Chile, Gabriel Boric, has said that the government is now preparing a bill to establish a tender mechanism for large-scale energy storage facilities. The measure aims to maximize the use of renewable energy generated in the northern part of the country.

How many Bess projects are there in Chile?

In the region, the company has a development pipeline of 7GW comprising 56 projects. Chile has seen a surge in co-located BESS and solar PV projects, either operational or in construction, as the country faces an increase in curtailment and transmission issues.
