

# Communications 300 000 5G base stations have been built and shared

## Overview

---

Will China build a 5G base station next year?

Technicians from China Mobile check a 5G base station in Tongling, Anhui province. [Photo by Guo Shining/For China Daily] China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

How many 5G base stations are there in the world?

In addition, a total of 819,000 5G base stations have been built by these three telecom giants, accounting for 70% of the world's total. As China has played a leading role in 5G technology, its 5G development has extraordinary significance for other countries.

Where is the first 5G base station made?

Back in July of last year, Verizon received the first U.S. manufactured 5G base station from a facility in Texas. Pictured is Verizon's CTO Kyle Malady holding some of the hardware. Image used courtesy of Ericsson.

How is the 5G base station market segmented?

The global 5G Base Station Market is segmented based on Frequency Band, Component Type, Station Type, End-use, and Geography. Based on the Frequency Band, the market is further segmented into less than 2.5 GHz, 2.5 – 8 GHz, 8 – 25 GHz, and more than 25 GHz.
