

# Container Generator Fire Fighting

## Overview

---

Does a generator room need a fire suppression system?

A good fire suppression system for a generator room is necessary. Generally, there are a number of fire extinguishing system types for generator rooms, such as the traditional sprinkler systems, combined sprinkler-foam systems, water mist systems and gas fire extinguishing systems.

How can a hydroPen system fight a container fire?

Finally, there's a faster, safer and more efficient way to directly fight container fires on board vessels. The HydroPen system makes it possible to directly extinguish container fires at heights, at deck and below deck on board cargo vessels. No other solution can do that.

Are FirePro fire suppression systems suitable for diesel generators?

FirePro fire suppression systems are suitable for the protection of diesel generators, as they are installed directly within the enclosure at risk.

Are natural gas generators a fire hazard?

As countermeasure, businesses install natural gas or diesel fueled generators for emergency situations. These generators present a fire hazard, since a spark, or the surfaces of the engine, can exceed the temperatures needed to ignite any fumes or fuel spills.
