

# Container solar accessories

## Overview

---

What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.

What are solar panel mounting accessories?

Solar panel mounting accessories are the backbone of every solar power plant as they provide support to the modules. These support structures raise solar panels at appropriate angles to ensure that they receive maximum solar irradiation.

Can a solar array be used inside a container?

Solar arrays inside of a container are applicable in a number of ways. Constant improvements in PV technology make it a great, future-proof solution. Below you can find just a few examples of the possible applications. The abundance of sunlight in the deserts makes solar-powered systems the most obvious choice in these areas.

Why do you need a solar container unit?

Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere. With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours.
