

Control switchgear in China in Finland

Overview

What is LV switchgear?

LV (Low voltage) switchgear is an engineered solution used to control, protect, and isolate electrical equipment or systems to allow work to be done and clear faults quickly and safely when required.

What is a switchgear used for?

It includes in one unit two switches that can connect the load to either or both main conductors, and a fusible switch or circuit breaker and switch that feed a distribution transformer. This type of switchgear is used for medium-voltage power distribution, from 7.2kV to about 36kV volts.

Where can I buy power distribution equipment in Beijing?

Add.: Room 1111, Block D, Jiahua Plaza, Shangdi 3rd Street, Haidian District, Beijing Welcome to SOJO, a trusted producer in the field of power distribution equipment! We can offer switchgear, ring main unit, pole mounted switches, switchboard, metal enclosed switchgear, cable accessories, etc. for your selection.

What type of switchgear is used to isolate a transformer?

This type of switchgear is used for medium-voltage power distribution, from 7.2kV to about 36kV volts. Ring main units can be characterized by their type of insulation: air, oil or gas. The switch used to isolate the transformer can be a fusible switch, or maybe a circuit breaker using vacuum or gas-insulated interrupters.
