Croatia's new flexible solar panels

Overview

Does Croatia have a solar market?

The Renewable Energy Sources of Croatia Association (RES Croatia) says Croatia's solar market is growing year over year. But with residential and industrial rooftops accounting for most new installations, a key focus is enabling utility-scale growth. Croatia installed 397.1 MW of solar in 2024, according to figures from RES Croatia.

Why should Croatia invest in solar energy?

By continuing to invest in solar, Croatia is becoming a regional leader in renewable energy. Its successful expansion of solar capacity can serve as a model for other nations transitioning to cleaner energy sources. For more insights and updates on Croatia's solar energy development, you can visit PV Knowhow.

Will Croatia get 1 GW of solar power by 2025?

Croatia is on pace to surpass 1 GW of solar power by 2025, thanks to a surge in installations and supportive government policies. This growth is part of the country's broader commitment to renewable energy and aligns with EU targets to boost the share of renewables in electricity generation.

How much solar energy does Croatia produce?

Current deployment is made up of approximately 655 MW on commercial and industrial (C&I) rooftops, 155 MW on residential rooftops, and 62.1 MW of large-scale solar installations. Croatia ranks at the bottom of the European Union for total solar energy production, generating about 3% of its annual electricity.
