

# **Danish Communications 5G Base Station Coverage**

## Overview

---

Does Denmark have 5G?

3 Denmark stated that 60% of its network was 5G-enabled in July 2022, as it continues the upgrade of its 5G network using 2100 MHz and 3.5 GHz frequencies, as well as modernizing 4G. TT Network (TTN), a joint network between Telia and Telenor, started upgrading the network to 5G following the mid-band spectrum award.

Which country has the highest 5G availability in Europe?

Denmark retained its position as Europe's leader, achieving an impressive 5G Availability of 83.4%, narrowly surpassing Switzerland, which remains the only other European country to exceed the 80% milestone to date. Spectrum configuration decisions are a critical pillar of mobile network design and play a direct role in shaping coverage outcomes.

Are Nordic operators celebrating 5G availability?

Analysis of Speedtest Intelligence ® data confirms that Nordic operators have much to celebrate. In Q4 2024, Nordic countries claimed three of the top five positions in Europe for 5G Availability—the percentage of users with 5G-capable devices spending most of their time connected to 5G networks.

What makes the Nordics a great 5G country?

Within Europe, the Nordics stand out on 5G performance. Part of this is because of 5G spectrum availability as all four of the Nordic countries on the continent have already assigned low-band and mid-band spectrum. This is ahead of the rest of Europe, as we have reflected on the 5G progress across Europe.
