

Does Finland have 5G base stations

Overview

Is Finland covered by a 5G network?

Half of Finland's population is soon to be covered by a 5G network. While 5G networks are constructed and consumers adopt 5G phones in increasing numbers, the application of the new technology in industry and business is making progress.

How many Finnish households have 5G?

In ideal conditions, more than 1.8 million Finnish households had access to fast 100 Mbps 5G connections at the end of last year, representing 67% of all households. The availability of 5G is concentrated in population centres and around arterial roads.

Who dominates the 5G market in Finland?

The 5G market in Finland is dominated by three key players, Elisa, Telia, and DNA. The coverage of 5G in the country is challenged by a vast contrast between urban and rural areas.

What percentage of Finland's roads are covered by 5G & 4G?

In late 2020, 100 Mbps 5G networks covered 17% of Finland's main roads and highways and 18% of the railway network, while 100 Mbps 4G coverage was available on 57% of both networks. Figure 2. 100 Mbps 4G and 5G mobile network coverage in ideal conditions on main roads, highways and railways.
