EU single glass solar curtain wall installation

Overview

What is PV IGU curtain wall system?

PV IGU Curtain Wall System manufacturing with double or triple glazed units for BIPV solar facade integration.

What is a solar insulated glass unit?

Solar-insulated glass units that Metsolar produces can vary in composition, size, fixing options, and light transmittance. Adjustments are based on the specific project requirements to meet the regulatory environment of installation. IGU with embedded solar cells can be used for both façades (curtain walls) or roofs (skylights).

What is a PV insulated glass unit?

This type of module technology is mainly used for curtain walls and PV skylight (rooftop) projects, where the cladding solution is expected to generate both: electricity and thermal insulation. PV Insulated Glass Units acts as a multi-layer structures for facades and windows.

What is an all-in-one curtain wall system?

The all-in-one curtain wall system is an extra outer shell that not only improves the building's energy balance, but offers the fabric lasting protection from weathering. The SL Modular offers a wide range of options for custom balustrade design.

EU single glass solar curtain wall installation

Facade solutions/curtain walls

SL Modular facade solution A comprehensive solution This modular system is designed as a curtain wall and combines the fixed balustrade element with a flexible and ...
