# Estonia Power Construction Energy Storage Project

## Overview

---

Where is Estonia's largest battery storage facility located?

The flagship battery storage project commenced operations on February 1, only days before cutting ties with the Russian power grid. Estonian state-owned energy company Eesti Energia has inaugurated the nation's largest battery energy storage facility at the Auvere industrial complex in Ida-Viru County.

How will a battery energy storage park work in Estonia?

The battery energy storage park and its substation will be connected to the electricity transmission network using a 330kV AC underground cable, marking a first in Estonia. Baltic Storage Platform confirmed that the BESS will seek to ensure the stability and resilience of the Estonian electricity grid.

How much will Estonia's nuclear power plant cost?

He said on no specific reactor has been chosen yet. The plant is expected to be built by private investors and company Fermi Energia has been at the forefront of Estonia's nuclear power plant discussions. The project is expected to cost €2 billion euros and small modular reactors with a capacity of 300 megawatts are being considered.

Will nuclear energy protect Estonia's economy against energy price shocks?

Nuclear energy was also on the table last Thursday when the government discussed ways of safeguarding the Estonian economy against energy price shocks in the future. Because nuclear energy is heavily regulated on the international level, its implementation is far more complicated and time-consuming than building any other kind of power plant.
