

# Flywheel energy storage companies

## Overview

---

What is a flywheel energy storage system (fess)?

To solve this problem, London-based startup Levistor has developed an innovative Flywheel Energy Storage System (FESS), which acts as a kinetic battery. This technology stores energy from the grid during periods of low demand and releases it rapidly when an EV needs a quick charge. It can deliver 100 miles of range in just five minutes.

Who is a flywheel energy storage manufacturer in China?

In 2017, HHE in flywheel energy storage manufacturers in China won the bid for the flywheel UPS project with a large order of nearly 100 million RMB, and successfully delivered a 16MW dynamic flywheel UPS system in 2018.

What is the largest flywheel energy storage system in the world?

Image: Shenzen Energy Group. A project in China, claimed as the largest flywheel energy storage system in the world, has been connected to the grid. The first flywheel unit of the Dinglun Flywheel Energy Storage Power Station in Changzhi City, Shanxi Province, was connected by project owner Shenzen Energy Group recently.

What is flywheel energy storage?

Flywheel energy storage is a technology that stores kinetic energy in a rotating mass. When energy is needed, the flywheel's rotation is converted back into electrical energy. This process is highly efficient and allows for rapid charging and discharging cycles.

## Flywheel energy storage companies

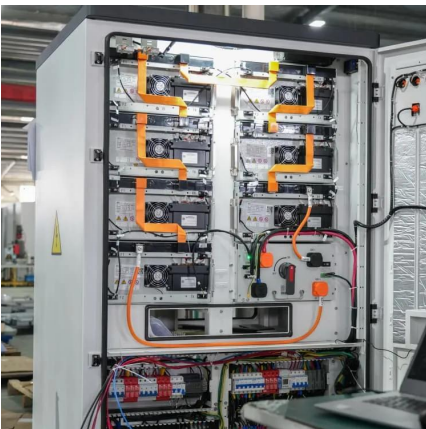

---

### CHN Energy Makes Major Breakthrough in Flywheel Energy Storage ...

On January 2, CHN Energy launched the world's largest single-unit magnetic levitation flywheel energy storage project, marking a significant advancement in energy ...
