

Free consultation on waterproof folding containers

Overview

Why do you need a lid for a foldable container?

Our foldable boxes come with a range of customizable features, offering flexibility for various industries and optimizing your logistics operations. Lids for foldable containers provide essential protection for contents, keeping items safe from dust, moisture, and contaminants during storage and transportation.

Why should you choose a folding container?

Contact us! Folding containers can give up to an 80% saving in volume and are available in standard footprints and heights. Lid and closure options are also available.

How much space does an empty folding container save?

As an empty folding container can save a volume of up to 80 percent compared to an upright container, a maximum of five times as many empty folded containers can be stored on the same floor space than would be possible with rigid containers.

What is a foldable steel storage container?

Foldable steel storage containers come in three lengths, each with a standard width of 2.1m. The smallest size is compact enough to be used as a garden shed, even in a small back garden in the most restricted of spaces. These products are also modular, so you can expand on storage space at any time by joining three units together.
