

Government Procurement of Fixed Photovoltaic Storage Containers

Overview

What is a PV supply chain in China?

The background of the case is introduced as follows. Under China's industrial distributed PV policy, there is such a PV supply chain system in Jiangsu, Zhejiang and Shanghai in China, in which a large PSM is responsible for the production of PV system products, and a large PSSP is responsible for the sales and service of PV system products.

Should government subsidies support PV supply chain companies?

When supported by government subsidies, the government should give full consideration to the power structure of the PV supply chain companies, and the relationship of equal status of supply chain companies is most conducive to the government's implementation of PV subsidies.

How do government subsidies affect the PV industry?

However, lucrative government subsidies often lead to PV enterprises not paying attention to technological innovation and blind production. Therefore, to improve the efficiency of government subsidies, enhance the overall performance of the PV supply chain, and achieve the healthy and long-term development of the PV industry.

Should solar-plus-storage systems be used in developing countries?

" Solar-plus-storage systems can provide clean, affordable, and reliable electricity access in developing countries while reducing dependence on fossil-based energy systems," said World Bank Vice President for Infrastructure Guangzhe Chen.
